

Equipped for Business

iPhone- I will use a cell phone to communicate and track deals and progress within the company or business. This is an essential tool to have in the modern world. Technology and cell phones have become a major part of our daily lives and for a large majority of us, our main way of communication. Communication is key in the world of business.

Ipad- I pads are commonly used while on job sites or at home or the office. These devices are similar to Iphones but are used for more work purposes instead of personal like a phone. You can keep up with business with ipads and other technology.

Computer/Laptop- Computers are very important in the business world. They are used to log data and for many other purposes. The world is at your fingertips with all of the modern day technology. A computer can be used for an infinite amount of jobs and almost every office or business has at least one computer.

Calculator- Numbers are a major part of business. Just about all of it actually. Being able to accurately calculate numeric info is very crucial and calculators are used for mathematics and solving equations. We rely on calculators for math each and everyday.

Suit- Dressing nice is very important in business. Wearing a suit or other nice clothing shows a level of professionalism which is very important. You wear suits for business deals and meetings.

Software- Software is key to businesses. These tools are at our disposal and some cost money, others are free to use. These are used for many, many things. These things include investments, costs, payroll, printing, stock market, business analysis etc. Businesses wouldn't run on the technology we use today without many programs and software we have.
