The History of The University of Cincinnati

The history behind the University of Cincinnati can be traced back all the way to 1819 when Cincinnati College and Medical College of Ohio were both chartered. In 1870 the city of Cincinnati founded the University of Cincinnati which expanded to include two smaller universities. In 1968 the university became a state affiliated school to grow in numbers and to grow the amount of money allotted to the school from the government. The University of Cincinnati is known best for its research programs and success through experimentation, but I am interested in the University for its business program.

While at UC I plan to live in a dorm for my freshman year, and transition into an apartment going into my sophomore year. I have friends and family who attend the university and we plan to live together. After adding up the estimated cost of books, courses, meal plans, etc. the cost of attending UC would end up being close to $34,500 a year. The cost per year may vary due to living situations and extra courses I am thinking of taking.

My main reason for choosing to attend UC is its location. I always planned to stay close to home when I went to college and UC allows me to do that. I have looked into other close by schools and their business programs, but the University of Cincinnati seems like the best fit for me and for what I want out of my college experience. I plan to apply to the Blue Ash campus and the Main Cincinnati campus. The reason behind both applications is cost and the commute. If I choose to attend UC Blue Ash I will live at home and commute each day; if I choose attend the main campus I will live in a dorm or apartment.

I am very excited to move onto this chapter of my life with all the responsibility and expanding who I am as a person. I think college is going to be exciting and filled with a lot of important life lessons and memories.
