

TOUR OF UNIVERSITY OF TOLEDO

Fitness center open to all Rocket's, 24/7 with your rocket card. They also have many different rooms for different types of workouts.

Indoor football field open to all students' with their Rocket card. Located in the fitness center. The students also hold different games on this field like flag football.

The football stadium. Referred to as the "Glass Bowl." The Rockets play here almost every Friday, in the season, unless they are at an away game.

University Hall, home of the math department. Most of the students' hang out in front of this quadrant, doing their studies, and hanging out with friends.

Only about 9% of the students at UT are a part of Greek Life. This struck me as odd because in the movies, everyone wants to be a part of fraternities and sororities. There are only about 12 different Greek houses.

UT has their own medical center, which is super cool considering I want to go into the medical field. It's big and beautiful!

UT has an indoor swimming pool, half the size of an olympic swimming pool. They also have pools with slides. UT holds movie nights in the pool, which would be fun!

UT has 9 different housing options, which to me is the best part because as a freshman I get to choose who I get to live with and where!
