

Career Profile for Special Education Teacher

In these pictures, there are teachers who are including every student and making sure that everyone is learning efficiently. In these pictures the students are painting and coloring. Even though the students don't fully understand what is going on, they still are enjoying learning and trying. I think that is a main reason as to why I want to be apart of this career. They are very inspiring.

A person that this career best suits is someone who is very patient, open minded, selfless, and has a lot of determination. Also someone who is very creative. Being creative can help a child remember something a little bit better instead of just saying it a boring way. Also someone who is dedicated in helping the kids and willing it be there when they have personal problems or something else going on. The skills that are

required to do the job well is to be organized, enthusiastic, responsible, good listener, and good communication skills.

If a person wants to advance in the career they need to do a good job all the time. They can't slack or get lazy. The kids here are not always going to be happy, so the teacher needs to be an encouragement and bring them happiness.
