

### **Pensacola Base and A School**

Pensacola Florida is a Major A school for the Navy--A school is 24 weeks long. Most job training takes place here. Pensacola was built in 1913 and was built to replace the training command in Tennessee. It's not just Navy that goes here either. The Marines use this base as well as the coast guard. Credit hours for college credit are given once completing A school. For example, I will have 16 credit hours in the IT field once I graduate.
